## Applied Brilliance Makes All The Difference

Admissions Open For 2020-2021

### Faculty of Pharmacy

The Department of Pharmacognosy, one of the core branches in the field of pharmacy was established in 2004. The Department is equipped with modern, sophisticated instruments, also maintains a crude drug museum and a medicinal garden. It aims to contribute to multidisciplinary drug research & development from natural sources and offers extensive training including latest development in the scientific field. Herbal drug standardization, Herbal product development, Pharmacological evaluation are the key research areas of the Department. It also involves in the development of nutraceuticals, cosmeceuticals, dietary supplements etc.,

## M.Pharm in Pharmacognosy

### Programme Highlights:

- Featured with semester pattern curriculum with an aim to achieve advanced knowledge; high order skills in analysis, critical evaluation and professional application
- Intended to think differently and independently to solve complex problems related to research and pharmaceutical process.
- Aimed to emphasize the concepts in the isolation of novel compounds and design of dosage forms
- Importance given to research projects based on industrial needs and in terms of novelty for patenting the application
- Structured to impart the students to take independent professional responsibilities and acquire necessary skills to compete with their global counterparts
- World class learning facilities with learner centric and outcome based learning
- Placement support

Inspiring Applied Thinking
