Department of Chemistry

Cordially Invite you to attend

Nobel Laureate Lecture Series 2026-2027

"Curious Cases in Asymmetric Catalysis: Non-Linear Effects and Autocatalysis"

Eminent Speaker

Prof. Santanu Mukherjee

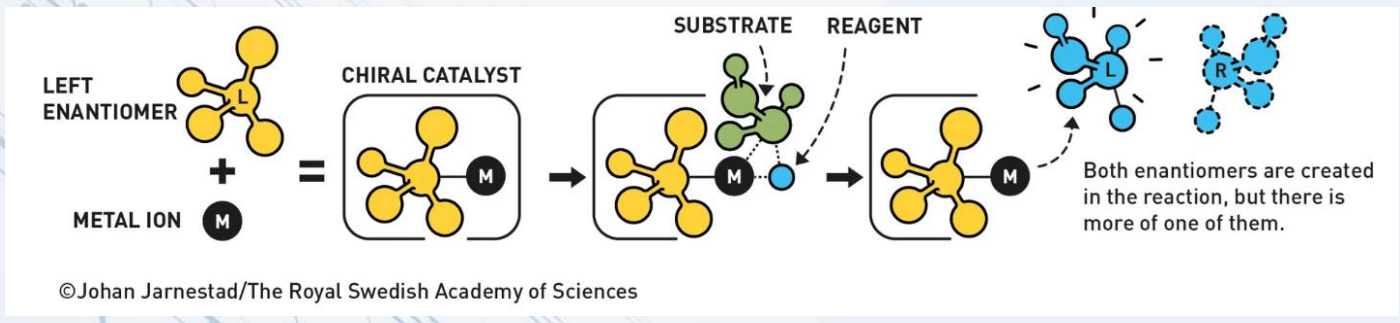

Department of Organic Chemistry

Indian Institute of Science,

Bengaluru, India . 560065

Session will emphasize on :

- Understanding the fundamental principles of asymmetric catalysis and enantioselective transformations.
- Exploring non-linear effects and their influence on enantioselectivity in catalytic reactions.
- Leveraging autocatalysis and its significance in the development of stereoselective organic synthesis.
- Investigating catalyst–substrate interactions and mechanistic aspects of asymmetric synthesis.
