Details of Patient Flow System in our Hospital

When the patient enters the hospital, he/she will register themselves in the registration desk.

Following completion of registration, patient is provided a card with registration details which include patient name, age, date of registration, phone number, unique hospital identity (UHID) and barcode.

Once the registration is done patient will be directed to visit department of Oral Medicine and Radiology for diagnosis.

During patient's visit to department of Oral Medicine and Radiology, detailed case history will be recorded followed by any necessary radiologic investigation. Based on the history and investigation, patient's condition will be diagnosed. Then, patient will be referred to the concerned department for the necessary treatment.

Later when patient visits respective departments, appropriate treatment will be done. Following the completion of the treatment, patient will be sent to billing section to make the payment before leaving the hospital.
