Department of Implantology

Faculty of Dental Sciences

Ramaiah University of Applied Sciences

RESTORING FUNCTION.

REDEFINING PRECISION.

REBUILDING CONFIDENCE.

The Implantology Department at the Faculty of Dental Sciences, Ramaiah University, offers a comprehensive, advanced curriculum and treatment spectrum focused entirely on prosthetically driven implantology. Backed by an interdisciplinary network of oral surgery, prosthodontics, and periodontics, the department serves as a premier hub for complex full-mouth rehabilitation, translational research, and advanced clinical training.

The department's distinguished faculty members possess over 20 years of dedicated experience in implantology alone. Holding elite international certifications and key leadership roles within national oral implant societies, they deliver world-class, precise treatment outcomes rooted in unmatched academic and clinical expertise. By integrating state-of-the-art digital workflows, guided surgery, and evidence-based methodologies, the department ensures unparalleled precision in patient care while shaping the future of dental implant education and specialized clinical practice.

Our Services

Advanced Full-Mouth Rehabilitation
Prosthetically Driven Implantology
Immediate Loading Protocols
Complex Full-Arch Reconstruction

Specialized & Interdisciplinary Care

Interdisciplinary Clinics: Coordinated, comprehensive care pathways integrating Oral Surgery, Prosthodontics, and Periodontics under one roof.
Peri-Implantitis Management: Specialized surgical and non-surgical therapeutic protocols to treat and preserve implant health

State-of-the-Art Digital Workflow & Guided Surgery
Computer-Guided Implant Placement
CAD/CAM Prosthetics
Custom-milled zirconia and titanium frameworks designed for optimal tissue biocompatibility and aesthetics

Advanced Hard & Soft Tissue Grafting

Sinus Floor Elevation
Guided Bone Regeneration (GBR)
Ridge augmentation utilizing advanced biomaterials, membranes, and growth factors
Soft Tissue Plastic Surgery
Connective tissue and free gingival grafts around implants to maximize long-term peri-implant health and pink aesthetics
